

Social Skills Groups

Summer 2016

Who

Social skills groups are for kids age 6+ with Autism Spectrum Disorder, High Functioning Autism, PDD-NOS, Asperger Syndrome, ADHD, Nonverbal Learning Disorder, or other social learning difficulties. Groups match 3-4 kids by age and social development level. Call us to discuss eligibility.

What

Social skills groups help kids with perspective taking, abstract thinking, and understanding humor and body language. Kids with social learning difficulties may miss important meaning behind a subtle glance, change of emotion, mood, or body distance, or misread another person's intentions. Group members will learn concepts using vocabulary and ideas from the Social Thinking® framework, created by Michelle Garcia Winner.

When

This summer (2016). Groups will meet for 4 weeks, one hour per week with a certified Speech-Language Pathologist. Location will be in North Colorado Springs, but dates and facility will be determined as groups are formed.
